15 Series

Fast and powerful precision machining centers for profitable production - with one, two or four spindles
Productive, fast and compact
Leading-edge technology offering high reliability, performance and precision

CHIRON 15 series vertical machining centers are among the best machine tools in their class in terms of speed, dynamics, compact construction, stability and reliability. With ample power for great milling capacity, the CHIRON 15 series can be supplied as single, double, four-spindle or multi-profile versions, and are characterized by:

- Reliably high productivity
- Highest precision and processing quality
- Reduced space requirements
- Fast set-up
- Simple operation
- High stability
- High dynamics
- Easy maintenance

Due to their modular structure and numerous configuration options, every basic machine of the 15 series can be combined to provide a perfectly customized solution.

Your benefits: High precision and cutting capacity, as well as high machine availability and lower cost per piece.
We love perfection ...

That’s why we view every detail as an exciting challenge. Whether automotive, aerospace, mechanical engineering, medical or precision engineering – the high-quality machining centers of the CHIRON 15 Series reduce processing times, produce excellent surfaces and compress your manufacturing process into the smallest space possible. The perfect tools to implement your product ideas quickly, with micron-level precision.

Market leaders trust us.
Versatility through high-tech modules
Perfectly suited to any application

Modular concept:
- Vertical traveling column principle
- Compact installation area from width 1,620 mm x depth 3,620 mm (W)
- Mineral cast machine bed
- High rigidity and thermal stability
- Precision glass scales on all axes
- Dynamic direct drives and precision guides
- High running, positioning and long-term precision
- Robust CHIRON rotary axes
- Fully enclosed work area, stainless steel covers
- Smooth, steep walls for ideal chip flow directly to the chip conveyor
- Ergonomic operating and loading concept
- Service friendly access to all auxiliary units
- High durability, low maintenance

CHIRON basket tool changer with 20 (2 x 12 for double-spindle machines) tool places (SK 40 or HSK 63). High productivity due to chip-to-chip times as short as 1.7 s.

Automatic tool change using the pick-up method from 0.9 s for 48/64 tool places (DZ 2 x 24/32 / TZ 4 x 14), HSK 63.

Background magazine for the provision of up to 158 tools during machining.

Highest precision: Glass scales and digital drive technology allow high acceleration and contour accuracy.

CHIRON controls of the 15 series: Siemens, Fanuc.
The right machine for each component
Proven modules for customized configurations

Flexible work areas and maximum paths:
X=730, Y=400, Z=425 mm

Process advantages:
- Maximum path [X–Y–Z]: 730–400–425 mm
- Maximum power: 58 kW (30% ED)
- Spindles / clearance DZ: 2 / 250 or 320 mm
- Spindles / clearance TZ: 4 / 200 mm
- Maximum spindle speed: 20,000 rpm
- Chip-to-chip time: ab 1.9 s
- Axis acceleration: X–Y–Z max. 12 m/s²
- Rapid feed as fast as: 75 m/min
- Max. number of tools: 158
- Tool taper: SK 40 / HSK 63
- Maximum tool weight: 10 kg
- Maximum tool diameter: 175 mm
- Max. tool length: 300 mm
- Automatic workpiece change from 3.5 s

The right machine for each component
Proven modules for customized configurations

Spindles & spindle systems
Automatic tool changer
Table options

Fast precision machining center with a basket tool changer and a 2-axis swivel rotary table for 5-axes simultaneous and complete machining. Workpieces can be machined with high surface quality in one set-up.

Multifunctional machining center for the complete machining of workpieces of different lengths from extruded profiles. Whether milling, tapping, counter-sinking, reaming or cutting – everything is possible.

www.chiron.de
Diversity and flexibility
Reliable technology and high precision as a foundation

FZ15 S
Flexible precision machining center with the fast basket tool changer. The fixed table provides ample space for various devices or NC rotary table assemblies.

FZ15 W
Fast precision machining center with automatic pick-up tool changer and workspace changing device for loading and unloading during machining.

Your advantages with the CHIRON fixed table or workpiece changing device:
- 3-axis machining center based on the vertical traveling column principle
- Expandable to four axes with the basic device or 5-axis machining with 2-axis swivel rotary table (IWW)
- Mineral cast machine bed
- High rigidity and thermal stability
- Clear, easily accessible work area
- Work area for larger workpieces or multiple set-ups
- Chip-to-chip time starting from 1.7 s
- Loading and unloading with workpiece changing device during machining (workpiece change time starting from 2.4 s)
- Workpiece changing device with central splash guard and optimal accessibility
- High table loading
- Optional fully integrated automation solutions (Variocell UNO)
Precision and dynamics at the highest level
Complete machining with CHIRON Five axis

The workpiece is positioned exactly in the center of the swivel axix, which minimizes compensating movements of the linear axes. The unique CHIRON basket tool changer allows extremely short cycle times. Combined with fast rapid feeds and the dynamic NC swivel rotary tables, non-productive times are reduced to a minimum.

Your advantages with CHIRON FX:
- Highest precision in positioning and simultaneous operation
- High rigidity and thermal stability
- Mineral cast machine bed
- Spindle speed up to 20,000 rpm
- Excellent surface quality
- Integrated CHIRON 2-axis swivel rotary table with direct measuring systems
- Integrated 6-way energy supply for clamping device on the face plate
- Zero-point clamping systems can be integrated
- Fourth axis with a pivoting range of up to ± 120°
- 5th axis with torque drive up to 1,000 rpm for turning work
- Automatic machine compensation due to the 3D touch probe TS27
- Optional fully integrated automation solutions (Variocell UNO)

Fast precision machining center with the fast CHIRON basket tool changer and a 2-axis swivel rotary table. High productivity, with chip-to-chip times as short as 1.7 seconds and tool changing times from 0.9 seconds.

Doubled productivity with minimal space requirements: fast double-spindle machining center with a 2-axis swivel rotary table with two face plates for efficient complete machining with five simultaneously controlled axes.

www.chiron.de
Manufacture up to 75% faster
Increase profits with 2 or 4 spindles

The multiplier effect – more spindles, more cutting, more profit: Doubled productivity on one machine means a reduction in machining time of nearly 50%. There is also the option of multi-sided machining using an NC-controlled rotary axis.

Your advantages with CHIRON multi-spindle machining:
- Reduction of energy and space requirements
- Reduction of total processing time
- Simplification of material flow
- Reduced investment costs
- Reduced staff resources
- Water-cooled motor spindles up to 20,000 rpm
- Spindles / clearance DZ 2 / 250 or 2 / 320 mm
- Spindles / clearance TZ 4 / 200 mm
- High rapid-feed speeds of up to 75 m/min
- Highest precision in positioning and simultaneous operation
- Precision glass scales on all axes
- CHIRON 2-Achs-Schwenktisch möglich
- Chip-to-chip time starting from 1.7 s
- CHIRON 2-axis swivel rotary table optional
- Optional fully integrated automation solutions (Variocell UNO)
Multifunctional by the meter
Complete machining of extruded profiles with the CHIRON MultiProfile

FZ15 MP
Multifunctional machining center for the complete machining of workpieces of different lengths from extruded profiles of any type. Milling, drilling, threading, counterboring, reaming or separating – anything is possible, regardless of whether series parts or variants are being machined.

Your advantages with CHIRON MP:
- Automatic production of consecutive workpieces
- Profile sizes up to 150 x 150 mm
- Lower costs per unit due to high productivity of the process
- Spindle speeds up to 20,000 rpm
- High production quality by machining in one set-up
- Cost-effective clamping design
- Minimal set-up effort for different batch sizes and variants
- Quick retooling for manufacturing variants
- Autonomous manufacturing
- Can be easily automated with different loading and unloading systems
- High durability, low maintenance

With the machining center FZ15 MP, you can process workpieces of any length directly from the extruded profile – continuously and completely. The profiles are precisely guided between two synchronized NC rotary axes, accurately positioned and firmly clamped. The raw material is automatically advanced by the feed unit. The workpiece is discharged via a practical unloader.
Options for your production
individualized to meet your specific requirements

CHIRON laser control
for tool breakage checks, for tool measurement and for machine compensation.

Stationary 3D probing system
TS 27 for tool length measurement, tool breakage checks as well as machine compensation.

Internal cooling via the spindle up to 70 bar, also available with a frequency-controlled pump.

Workpiece gripper in the main spindle for machine-integrated workpiece handling.

Background magazine for the provision of up to 158 tools during machining.

Series 15 – further options:
- High Speed Plus package
- Reinforced spindle drive
- Work area suctioning unit
- Connection for central suctioning unit
- Energy-efficiency package with an intelligent energy-saving control
- Automatic doors
- Zero point clamping systems
- Oil package with fire-extinguishing system
- Background magazine with a shelf construction
- Robot interface and much more

Background magazine for the provision of up to 158 tools during machining.

Turnkey customization completely from one source

Individual automation and engineered solutions for greater productivity

Variocell UNO
Flexible and inexpensive a compact machining center, handling robot, workplace storage and workplace changing device (0°/180°) for loading and unloading during machining.

Your advantages with CHIRON Variocell UNO:
- Integrated automation in the smallest possible space (< 1 sq. meter)
- Machine and automation as a unit – no safety fence
- Simple installation and set-up, as well as in-plant repositioning
- High efficiency for more profit
- High storage capacity
- Simple operation and programming
- Raw and finished part pallets can be replaced during machining
- Double gripper robot for quick workpiece change (option)
- Integrated measuring part discharge (for instance SPC parts)
- Unrestricted access to the work area in the manual mode
- Robots can be used for additional tasks

Variocell SYSTEM — Customized automation solutions:
- Machine-integrated spindle grippers
- Portal and articulated-arm solutions
- Load and unload devices
- Pallet changing systems
- Pallet storage for raw and finished parts
- Interlinked systems and much more

CHIRON TURNKEY
- Comprehensive process design
- Expert engineering
- Experienced project management
- Validation of statistical process capability

Ensuring targeted productivity
- Production assistance during the initial phase
- Training in operation and programming
- CHIRON Service available around the world

From the planning stage to serial production
Today, manufacturing excellent machining centers is not enough. Users expect a solution, which is as individual as it is intelligent. From one specific machining task, a „Turnkey process“ is to be developed around the workpiece based on the specifications and constraints. The CHIRON TURNKEY makes it possible to optimally solve complex tasks.

Together with perfectly adapted technology modules, CHIRON engineers create the most economical solution from one source to meet the customer’s special needs. This ensures decisive competitive advantages for CHIRON customers. CHIRON not only offers the machining solution itself, but also the support to keep manufacturing running at an optimal level.
Training courses and Workshops

Ahead through qualification, because knowledge leads to success.

To enable you to use your CHIRON CNC machining center optimally, we offer a comprehensive range of qualification measures, training courses and training for operators, setup personnel and service technicians.

The training programme is characterised above all by flexibility in implementation. In addition to the courses in our CHIRON training centre, these can also take place at your location. Our trainers are able to offer courses in German and English. Optionally we offer further languages with the help of a translator.

SmartLine

The path to „Digitally enhanced machining“ is prepared

Intelligent machine control, digital networking, mutual machine communication, if „Digitally enhanced machining“ is mentioned, CHIRON may already has something to say. With the SmartLine program, the CHIRON Group provides a modular software system that enables customers to unlock the full potential of the digital manufacturing process.

In the CHIRON Training Center, we get interested persons, both beginners and pros, up-to-date with the latest technology, step by step. With a number of individually combinable machine courses and programming courses, in this way to qualify your employees while increasing the productivity of your CHIRON CNC machining center. This leads to more success for your company, since qualified and motivated employees are an important success factor.

Our training courses are designed didactically according to the latest teaching methods. By doing practical work in small groups, we take into account the field of interest and the level of knowledge of the participants.

Our philosophy is to strongly qualify the participants through their own work on our training objects. Subsequently, what has been learned can be directly put into practice in routine work.

CHIRON training courses and training are available for the following topics

- Service and maintenance
- Operation
- Programming
- Components
- Robot
- Customer-specific
